

User Manual

Booking - Ensemble - Repertoire - Client Re-engagement

the-masterpieces-app.netlify.app

A complete guide to running The Masterpieces from one place - tracking inquiries from first hello to confirmed performance, building lineups, sharing sheet music, and keeping past clients coming back.

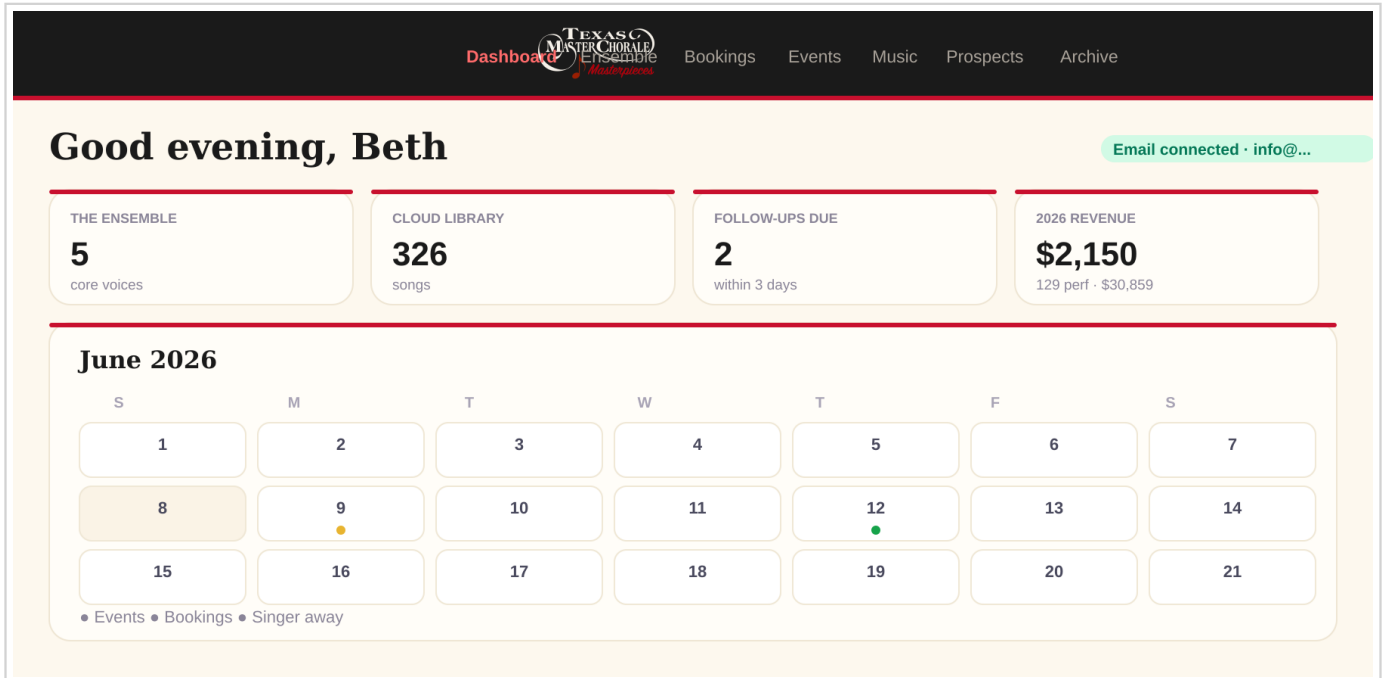

1. The two experiences

The app has **two separate views**. As a manager you see everything; each singer sees only their own world.

- **Managers (Beth)** open the main app - dashboard, bookings, events, music, prospects, archive.
- **Singers** open a private personal link - their schedule, RSVP, sheet music, and a "when I can't sing" calendar. They never see your bookings or revenue.
- It is a website - works on laptop, iPad, or phone, nothing to install. If something looks stale, refresh (Cmd/Ctrl + Shift + R).

2. The Dashboard

Your home screen and daily snapshot.

The Dashboard: status, stat cards, and the month calendar.

- **Email chip** (top right) shows whether sending is connected.
- **Stat cards** - ensemble size, library, follow-ups due, and revenue (this year + all-time). Tap any to jump there.
- **Calendar** - green = events, amber = bookings, red = a singer is unavailable. Tap a day for details; below it, "Who's away" lists each singer's blackout periods.

3. Creating a booking

Tap **New Inquiry** on the Bookings tab for a guided, 4-step wizard.

New Booking · What will you send? Step 3 of 4

PERFORMANCE FORMAT

Quartet
needs 4 singers

Trio
needs 3 singers

Duo
needs 2 singers

Soloist
needs 1 singer

Quintet
needs 5 singers

DJ
no singers

EXPECTED FEE (\$)

650

Back Next >

Step 3 of the New Booking wizard - the format sets how many singers you need.

- **Who's asking** - contact + organization. **What's the event** - date + occasion.
- **What will you send** - pick a format (Quartet=4, Trio=3, Duo=2, Soloist=1, DJ=0). This sets the singers needed.
- **Anything else** - notes, then a review and Create. The booking lands in your list with a lineup status chip.

4. Filling the lineup

Open a booking and the black **"Next step"** coach tells you exactly what to do next - Details, Lineup, Availability, Confirm, Event - with the button to do it.

NEXT STEP

✓ Details ✓ Lineup **Availability** Confirm Event

Email your singers, then mark their replies until you're covered.

SINGER AVAILABILITY · 2/4 CONFIRMED Email Availability

SM Sherry Miller
Soprano yes maybe no

DW Donna White
Alto yes maybe no

SM Steve Miller
Tenor yes **maybe** no

JT Jim Tucker
Bass ✗ Away this date

⚠ 2 more confirmed needed. Add singers, or downsize below.

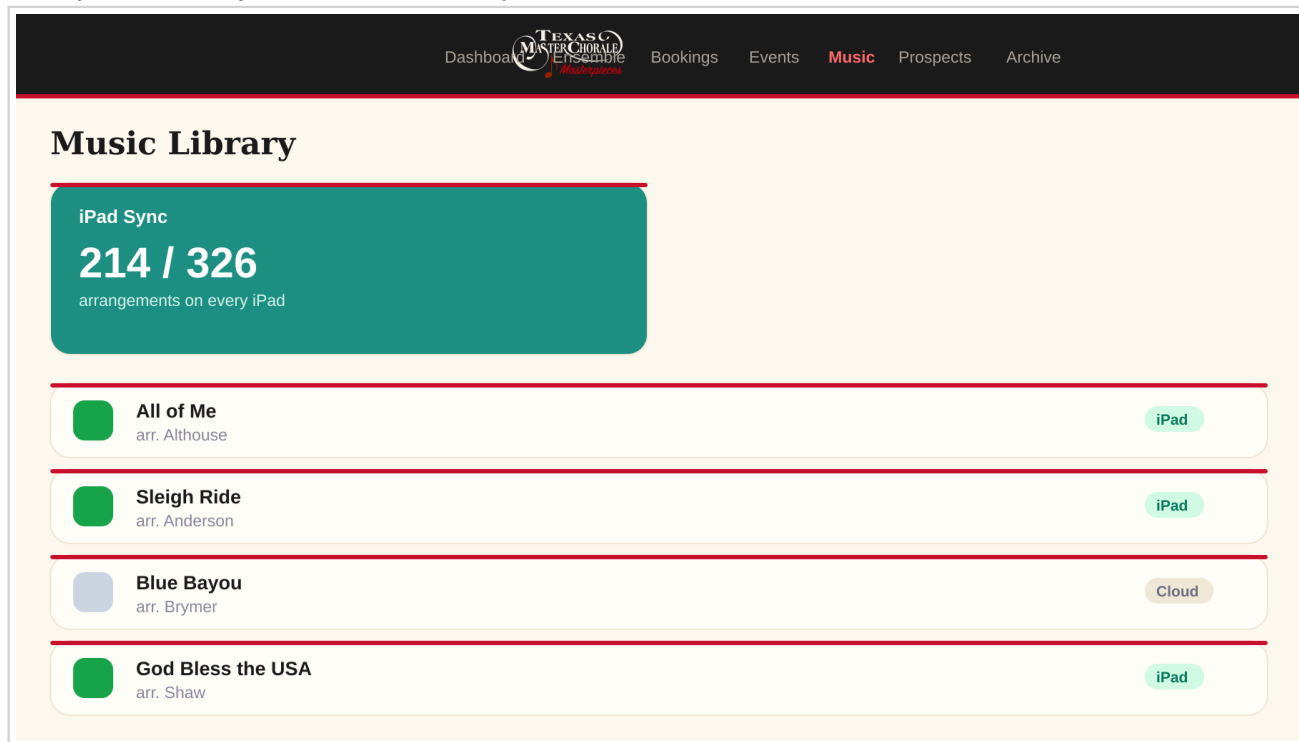

The "Next step" coach and the Singer Availability panel.

- Tap a singer's **+** to add them, then mark **yes / maybe / no** as they reply.

- Anyone who blocked that date is flagged **"Away this date"** automatically - no email needed.
- **Email Availability** sends a branded "are you in?" note to the singers you picked.
- Short on singers? **Invite a guest**, **Downsize** the format, or **switch to DJ**. When covered, **Confirm with client**, then **Add to Events**.

5. Music & iPad sync

Your repertoire library doubles as a one-tap iPad loader.

The Music library - tap a piece to push/pull it from every iPad.

- **Upload Arrangement** with title, arranger, category, and a **download link** (a shareable PDF/Drive URL).
- Each piece is **On iPads** (green) or **Cloud only** - tap to flip it for everyone at once.
- The download link is what powers the singers' download buttons in their portal.

6. Prospects & the stay-in-touch drip

Your CRM of leads **and** every past client (pulled from your event history).

Dashboard

Bookings
Events
Music
Prospects
Archive

Prospects

3 drip reminders due: Susan Pruitt, Nancy Decker, Peggy Fields

The Villages at Gleannlo Susan Pruitt ★ client reminder due	Pizzazz with Jazz Nancy Decker ★ client drip on
Faithbridge FAN Sherry Dunn ★ client	New Lead — Rotary Club —

Prospects - past clients carry a "client" badge; the drip schedules reminders.

- Past clients show a **client** badge with their booking history in the notes.
- **Start drip** schedules periodic "we're available" reminders; a banner shows which are due.
- **Send reminder** opens a pre-written email, logs it, and schedules the next - turning past clients into repeat bookings.

7. The Singer Portal

Each singer opens their private link (from Ensemble - Copy/Email link). No password.

WHEN YOU CAN'T SING

Tap any day you're unavailable — Beth sees it instantly.

What a singer sees: their events, RSVP, sheet-music downloads, and a "can't sing" calendar.

- **RSVP** Yes / Maybe / No writes straight back to your availability tracking.
- **Music** - download each piece (when a link is set).
- **"When you can't sing"** - they tap days they're out, and you see it instantly on bookings and the dashboard.

8. Events, Archive & Email

- **Events** - upcoming performances: manage the lineup, pick songs (Program), and **Send Proposal** to the client.
- **Archive** - past performances with full data, a revenue summary, search, and an **"Email client - re-book"** button.
- **Email - Send Now** delivers fully branded emails from info@themasterpieces.org; templates cover intros, follow-ups, confirmations, thank-yous, the stay-in-touch reminder, availability requests, and program proposals.

9. Tips & troubleshooting

- Looks old / didn't update? Hard refresh (Cmd/Ctrl + Shift + R).
- A screen ever goes blank? It now shows a "Something went wrong - Reload" message; tap Reload.
- Singer download says "Not posted yet"? Add a download link in Music.
- Email says "not configured"? The Resend key needs setting in Supabase (one-time).
- Deleting asks to confirm and removes related records - it can't be undone.
